COMPARATIVE STUDY OF JOB STRESS OF TEACHERS WORKING IN SELF FINANCED COLLEGES OF PUNJAB AND RAJASTHAN STATE

Naresh Gandhi, Ph.D.
Assistant Professor, Department of Education, Kenway College of Education, Abohar, Punjab, INDIA.

Abstract

In present study the researcher investigated the job stress of teachers working in self financed colleges of Punjab and Rajasthan State. In this research, sample of 200 teachers were selected randomly from self financed colleges of Punjab and Rajasthan state. Occupational Stress Index (OSI) by Srivastava and Singh (1984) was used for the investigation. The obtained data were analyzed by mean, standard deviation and t-ratio with the help of SPSS. The study revealed that there is no significant difference in the job stress of teachers working in self financed colleges of Punjab and Rajasthan state.

Key words: Job Stress, Self Financed College teachers, Punjab and Rajasthan State.

INTRODUCTION

Education is a continuous and creative process. It may be formal, informal or non-conventional. In formal education teacher has a very important place in improvement of education. Teachers’ role in society, in general and in education has varied with time, but the grandness of this position is same. Teachers are the most significant resources in educational institutions. They are the key figures for any learning reforms needed in education structure. The provision of excellence in education system depends on high quality teachers. High morale, appropriate subject knowledge and the teachers’ specialized teaching skills are fundamental to quality teaching and learning.

Today the teachers are greatly responsible for the student's time to come. So the teacher should be physically and mentally strong so that they can reach their targets successfully. For a good teacher it is important that he should be free from physical and psychological diseases. To stay fit a teacher should therefore be out of stress. However, if the teacher is subjected to excessive stress and strain, he can't maintain his mental balance. If not dealt seriously teacher's stress is one of the major factors influencing his teaching efficiency.

If the teacher has job stress, then he can't well adjust with the organizational climate and can't feel satisfied with his job.

**JOB STRESS**

Job stress, also known as occupational stress, has been defined as the experience of negative emotional states such as frustration, worry, anxiety and depression attributed to work related factors (Kyriacou, 2001).

Job stress or occupational stress can be defined as the harmful physical and emotional responses that occur when the requirements of the job do not match the capabilities, resources, or needs of the worker. Job stress can lead to poor health and even injury. The concept of Occupational stress is often confused with challenge, but these concepts are not the same. Challenge energizes us psychologically and physically, and it motivates us to learn new skills and master our Occupations. When a challenge is met, we feel relaxed and satisfied (U.S NIOSH, 1999).

Thus, challenge is an important ingredient for healthy and productive work. The importance of challenge in our work lives is probably what people are referring to when they say, "a little bit of stress is good for you. Occupational stress is that which derives specifically from conditions in the work place. These may either cause stress initially or aggravate the stress already present from other sources. In today’s typical workplace, stress is seen as becoming increasingly more common. People appear to be working longer hours, taking on higher level of responsibilities and exerting themselves even more strenuously to meet rising expectations about Occupational performance. Competition is sharp. There is always someone else ready to “step into one’s shoes” should one be found wanting.

**SIGNIFICANCE OF THE STUDY**

Teaching profession is generally considered as a noble profession with lot of expectations from parents towards their children’s education the development of their personalities. These expectations may also contribute as a source of stress. If a teacher himself/herself is suffering from the stress problem, how will he/she eliminate the stress of children? This study is important because the result of the study would help to comprehend, interpret and understand the level of the stress of college teachers in Punjab and Rajasthan state. This study will also
give the status of comparative scenario of the two neighboring states i.e. Punjab and Rajasthan

**STATEMENT OF THE PROBLEM**

Comparative Study of Job Stress of Teachers Working in Self Financed Colleges of Punjab and Rajasthan State.

**OBJECTIVE OF THE STUDY**

To compare the difference in job stress of teachers working in self financed colleges of Punjab and Rajasthan state.

**HYPOTHESIS OF THE STUDY**

There is no significant difference in job stress of teachers working in self financed colleges of Punjab and Rajasthan state.

**DELIMITATIONS OF THE STUDY**

- The study was delimited to self financed college teachers of Punjab and Rajasthan state.
- Only 200 teachers were selected for present study.
- The study was delimited to of 4 districts of Punjab and Rajasthan state. The districts under study were Fazilka and Shri Muktsar Sahib in Punjab, and Sri Ganganagar and Hanumangarh in Rajasthan.

**DESIGN OF THE STUDY**

Descriptive Survey Method was used in the present study for the investigation.

**SAMPLE**

For the present study sample consisted of 200 self financed college teachers selected randomly from different colleges of Punjab and Rajasthan state.

**TOOL USED**

Occupational Stress Index (OSI) by Srivastava and Singh (1984)) was used for the investigation.

**ANALYSIS AND CONCLUSION OF DATA**

For the analysis of data Mean, Standard Deviation & t-ratio were calculated.

**RESULTS OF COMPARISON OF JOB STRESS OF TEACHERS WORKING IN SELF FINANCED COLLEGES OF PUNJAB AND RAJASTHAN STATE**
Table 1.0 shows the summary of statistical calculation for obtaining t-ratio with regards to comparison of job stress of teachers working in self financed colleges of Punjab and Rajasthan state.

**Table 1.0: Showing t-ratio of job stress of teachers working in self financed colleges of Punjab and Rajasthan state**

<table>
<thead>
<tr>
<th>Sr. No.</th>
<th>Group</th>
<th>N</th>
<th>Mean</th>
<th>S.D.</th>
<th>SE₀</th>
<th>df</th>
<th>t-ratio</th>
<th>p-Value</th>
<th>Level of Significance at 0.05 and 0.01</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Punjab</td>
<td>100</td>
<td>133.20</td>
<td>14.06</td>
<td>2.04</td>
<td>198</td>
<td>.441</td>
<td>.66</td>
<td>Not Significant</td>
</tr>
<tr>
<td>2</td>
<td>Rajasthan</td>
<td>100</td>
<td>134.10</td>
<td>14.81</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Table 1.0 indicates that the computed p-value is .66 > 0.05 = α and the computed value of t-ratio has come out to be .441 which is less than the t-value 1.96 in table at .05 and 2.56 at .01 level of significance. Therefore, from the table it may be concluded that there is no significant difference in the job stress of teachers working in self financed colleges of Punjab and Rajasthan state. Hence our null hypothesis that there is no significant difference in job stress of teachers working in self financed colleges of Punjab and Rajasthan state is accepted.

Further, we can see that mean value (133.20) of job stress of teachers working in self financed colleges of Punjab state is almost equivalent to mean value (134.10) of teachers working in self financed colleges of Rajasthan state, the mean difference is negligible (.90) which is not significant, so it has been concluded that teachers working in self financed colleges of Punjab and Rajasthan state are having almost same level of job stress.
